

## Climate Career Summit

July 12, 2023

### Sponsorship Opportunities

Enterprise youth are taking part in solving the biggest crisis of our time. Join us as we develop the careers and green skills of young people who will accelerate climate change solutions.

The **Climate Career Summit** brings together approximately 450 youth in a virtual roundtable discussion with climate leaders who will share their experience as business leaders, scientists, job-creators, and policy makers. The Climate Career Summit will expose young people to career pathways that have positive impacts on preserving our planet. In addition to inviting all youth participating in 2023 programming, we also welcome Enterprise for Youth's Board of Directors, Climate Advisory Board, employment partners, alumni, and volunteers.

**Speakers** for the 2023 Summit (list in progress) include Ilana Cohen (Zero Hour & Fossil Free Research), Freddy Coronado (San Francisco Environment Department), Caroline Chick (Activate Capital), Alexia Leclercq (Start:Empowerment), Arieann Harrison (Marie Harrison Community Foundation, Inc.), and Sergio Missana (Climate Parliament).

**Sponsors** of the Climate Career Summit receive recognition in marketing and event materials related to the virtual event taking place on July 12, with a reach of up to 15,000 individuals. By supporting the 2023 Summit, you'll be an early supporter of the Climate Career Corps that is developing a future workforce that is capable of meeting the urgent and growing need for green jobs and green skills.

The Climate Career Summit is part of Enterprise for Youth's **Climate Career Corps**, a multi-year program that exposes youth to green jobs by placing them in paid internships while engaging in substantive educational and career skills programming. **Youth from diverse, historically under-represented communities** learn about ecology, climate science, and environmental justice; make positive, visible contributions to the stewardship of their environment and health of their community; gain work experience and develop green skills through paid climate-related internships; and cultivate personal and civic responsibility. The Climate Career Corps launched in summer 2022 with approximately 280 young people gaining valuable work experience. In 2023, over 300 youth will be paid to learn green skills as part of this internship program.

Founded in 1969, **Enterprise for Youth** empowers under-resourced San Francisco youth to reach their potential through transformative paid internship experiences supported by a community of employers, caring adults, and peers.
